

BLEДАР BUNJAKU

Software Engineer (React / NestJS / AI Systems)

Building scalable SaaS platforms, AI systems, and real-time applications

📍 Remote (EU / Norway)

PROFILE

Software Engineer specializing in scalable SaaS platforms, AI-powered systems, and real-time applications.

Experienced in building production-ready systems across the full stack using TypeScript, with a strong focus on clean architecture, modular backend systems, and modern frontend development.

Worked with Norwegian teams delivering end-to-end features from design to deployment.

CORE COMPETENCIES

Frontend: React, TypeScript, Vite, TailwindCSS, Mantine UI, TanStack Query, React Hook Form, Yup

Backend: Node.js, NestJS, Fastify, REST APIs, JWT Authentication

Database: PostgreSQL, Prisma ORM, Drizzle ORM

Other: OpenAI (LLM integrations), Stripe, Docker, CI/CD, WebSockets

SELECTED PROJECTS

Loopfront — Circular Economy SaaS Platform (Norway - <https://www.loopfront.com>)

Production SaaS platform enabling enterprises and public-sector organizations to reuse materials and reduce environmental impact.

Tech: React, TypeScript, NestJS

Key Contributions:

- Developed full-stack features for real-world production usage
- Built scalable backend services and APIs
- Worked on marketplace and resource management flows
- Contributed to data workflows and platform architecture
- Collaborated in delivering production-ready solutions

FutureReady — AI Coaching & Performance Platform (Norway - <https://futreready.ai>)

AI-driven platform that analyzes conversations to provide coaching, insights, and measurable performance improvements.

Tech: NestJS, PostgreSQL, AI integrations

Key Contributions:

- Developed backend services for processing conversational data
- Integrated AI-driven feedback and recommendation systems
- Built scalable data processing and analytics workflows
- Contributed to real-time and performance-focused architecture

Vaenso — Energy Analytics & Service Platform (Norway - <https://app.dev.vaenso.no>)

Full-stack energy platform connecting consumers and service providers for energy optimization and management.

Tech: React, TypeScript, NestJS, PostgreSQL

Key Contributions:

- Designed modular backend architecture using Domain-Driven Design
- Built onboarding system with external integrations (Elhub)
- Implemented AI chatbot with multi-provider support (OpenAI, Anthropic)
- Developed real-time engagement system using SSE
- Built file upload system with S3-compatible storage

Companion — AI Diary & Conversation Platform (Norway - <https://com2.ai>)

AI-powered SaaS platform enabling conversational interaction and structured diary generation.

Tech: NestJS, PostgreSQL, React, OpenAI, Stripe

Key Contributions:

- Built AI conversation engine with session handling
- Designed diary generation system from conversations
- Integrated Stripe subscription system (billing, webhooks)
- Developed backend architecture and APIs

Safe Search — Search & Rescue Platform (Norway, EU Project - <https://safesearch.no>)

Real-time system for coordinating search and rescue operations.

Tech: React, NestJS, PostgreSQL, Socket.IO

Key Contributions:

- Implemented real-time communication system
- Integrated geospatial features using Leaflet
- Optimized performance for large datasets

Employee Management & CV Generation System

System for managing employee data and generating structured CVs.

Tech: React, NestJS, PostgreSQL

Key Contributions:

- Designed backend architecture and data flows
- Implemented CV generation logic
- Built dynamic frontend forms and workflows

TECHNICAL STRENGTHS

- Strong system design and architectural thinking
- Experience building real-world SaaS platforms
- Full ownership from backend to frontend
- Focus on scalability, maintainability, and clean code

- Experience with AI systems and LLM integrations

PROFESSIONAL FOCUS

My goal is to build software that is scalable, modular, maintainable, and production-ready.

I specialize in designing and delivering complete SaaS platforms that combine structured backend architecture with modern, user-focused frontend applications.
